FIELD ATTENDANCE

Employee Step-by-Step Guide

369ai.Biz Employee Attendance App

A simple guide to checking in, logging trips, recording customer visits, and checking out for the day.

About Field Attendance

Field Attendance is the daily workflow for employees who work on the move — drivers, delivery staff, sales representatives, and field technicians. Instead of a single in/out punch from the office, the app lets you check in from anywhere, record every trip, log every customer visit at the actual visit location, add fuel stops, and check out at the end of the day.

This guide walks you through everything you need to do during your workday, in the order you will do it.

Your Day at a Glance

- Open the app and log in with your PIN
- **Check In** — capture a photo and your starting location
- Set up your Primary Trip (home to office)
- Add Secondary Trips for each customer visit
- Add fuel stops whenever you refuel
- Set up your Return Trip (visit to office, or visit to home)
- **Check Out** at the end of the day

Step 1 Open the App

On your phone, open the Employee Attendance app. You will see the app home screen with all the options.

Tap **User Attendance** to begin.

Step 2 Log In with Your PIN

Enter your 4-digit PIN to verify your identity, then tap Verify PIN. The app will identify you by your Badge ID.

Step 3 Go to Field Attendance

You will land on the Field Attendance screen. It shows today's date, the live time, and your name with a FIELD badge. The Check In button is at the bottom.

Step 4 Check In

Tap the Check In button. A confirmation dialog will ask “Are you sure you want to check in?” Tap YES.

The app will then open the camera. Position your face inside the circle and wait for the countdown. The app will automatically take your photo and capture your current GPS location.

TIP Your photo and location are used as your work-start anchor. Make sure your face is clearly visible in the frame before the countdown ends.

Step 5 If You Are Late — Submit a Reason

If you have checked in after your shift start time, the app will show a “You're Late” dialog. It will tell you how many hours late you are, your expected start time, and any salary deduction that applies.

Type a brief reason in the text box (for example, “Traffic”, “Personal emergency”, “Doctor visit”) and tap Submit Reason. Your reason will be logged for HR review.

PART 2 Your Primary Trip (Home to Office)

If you drove from home to your office before starting customer visits, log that journey as your Primary Trip. If you went directly from home to a customer site, skip this part and go to Part 3.

Step 6 Tap Setup Primary Trip

On the Field Attendance screen, find the blue Setup Primary Trip (Home → Office) button and tap it.

Step 7 Create a New Trip

A small popup will open. Tap Create New Trip. This will open the Vehicle Tracking form, where you record the details of your journey.

Step 8 Select Your Vehicle

Tap the Vehicle dropdown and choose the vehicle you are using today. Once you select a vehicle, the driver, plate number, and other details will fill in automatically.

Step 9 Set Source and Destination

Your Source is filled in automatically from your phone's current GPS location. For the Destination, tap the field to open the map — search for the place or tap the map to drop a pin, then tap Confirm Destination.

The app then calculates the estimated kilometres and travel time automatically.

Location check (within 150 m): before the trip starts, the app uses GPS to confirm you are actually at the Source and Destination, within about 150 metres. If it shows you as too far, move closer and tap Verify again; if it still cannot confirm after one retry, you can continue anyway.

Times are automatic and in office time: each trip's Start and End times are recorded automatically when you start and close the trip — you do not type them — and every time is shown in your office's timezone.

TIP If you see ‘Source Match: Not verified’, tap Verify next to it. The app will check your current GPS against the source location.

Step 10 Enter Start Kilometres

Scroll down to the Odometer & Timing section. Enter your vehicle's current odometer reading in the Start KM field.

Required before the trip starts: Start KM must be greater than 0, and the trip will not start until the key fields (Vehicle, Source, Destination and Start KM) are filled — a banner shows anything still missing. A trip you have not started yet stays as a draft; re-open it with Edit to finish the details and tap Start Trip.

Step 11 Complete the Pre-Trip Checklist

Scroll down to the Pre-Trip Checklist. Tap each item — Coolant Water, Oil Checking, Tyre Checking, Battery Checking, Fuel Checking, Daily Checks — to confirm your vehicle is ready.

The screenshot displays the 'New Vehicle Tracking' screen in the 369ai.Biz app. At the top, there's a header with a back arrow, the title 'New Vehicle Tracking', and the 369ai.Biz logo. Below the header, there are input fields for 'Invoice numbers' and 'Amount', with a QR code icon next to the first field. The 'Amount' field contains the number '0'. The main section is titled 'Pre-Trip Checklist' with a '1 / 6 done' indicator. It contains six checklist items: 'Coolant Water', 'Oil Checking', 'Tyre Checking', 'Battery Checking', 'Fuel Checking', and 'Daily Checks'. Each item has a corresponding icon and a toggle switch. The 'Fuel Checking' item is currently checked. Below the checklist is a section titled 'Notes & Attachments'. It includes a 'Remarks' field with a placeholder text: 'Add notes about this trip – e.g. road conditions, customer feedback, fuel observations...'. The field is marked as 'Optional' and has a character count of '0 / 500'. At the bottom, there is a dashed box with a camera icon and the text 'Add a Trip Photo' and 'Tap to use Camera or Gallery'.

Step 12 Start the Trip

Tap the Start Trip button at the bottom. You will see a “Trip started successfully!” message. The app will return to the popup with your new trip already selected.

Tap **Save**. Your primary trip is now recorded for the day.

The screenshot displays the 'Field Attendance' screen of the 369ai.Biz app. At the top, there's a back arrow, the title 'Field Attendance', and the 369ai.Biz logo. Below the title, there are two tabs: 'Today' (active) and 'History'. The 'Today' tab contains two large buttons: 'Check In' with a green arrow icon and 'Check Out' with a grey arrow icon. Below these, there's a yellow notification bar stating 'Late by 8:45 · Deduction 350.00'. Another yellow bar with a question mark icon says 'How to fill your Field Attendance for today' with a right arrow. The 'Primary Trip' section shows details for a trip with source 'VT-0086', from '10, Madurai Rd, Nagal Nagar, Tamil Nadu', to 'Chinnakada, Kollam', and status 'in_progress'. It includes buttons for 'Open Source Trip' and 'Add Fuel'. Below this is a blue button labeled '+ Secondary Trip'. The 'Trip Totals' section shows four input fields: 'Total KM' (0), 'Duration (Hrs)' (0), 'Total Fuel (L)' (0), and 'Total Fuel Amt' (0). At the bottom, a red button labeled 'Check Out' is visible, and a dark grey toast message says 'Primary trip saved'.

PART 3 Adding Fuel During a Trip

Any time you refuel during a trip, you can log it directly from the trip card. You can add fuel any number of times in a day.

Step 13 Tap Add Fuel on the Trip Card

On the Field Attendance screen, find the trip card for your current trip. Tap the green Add Fuel chip.

Step 14 Fill the Fuel Entry Form

The Add Fuel Entry form will slide up. Enter:

- **Fuel Amount** — how much you paid (in your currency)
- **Fuel Litres** — how many litres you fuelled
- **Current Odometer** — your vehicle's odometer reading at the fuel stop

The screenshot shows a mobile application interface. At the top, there's a header bar with a back arrow, the text 'Field Attendance', and the logo '369ai.Biz'. Below this, a modal form titled 'Add Fuel Entry' is displayed. The form has a close button (X) in the top right corner. Inside the form, it says 'For trip: VT-0086 - Bajaj/Pulsar 150/TN01A0002 - GPS captured'. There are three main input sections: 'Fuel Amount *' with a text box containing '20', 'Fuel Litres *' with a text box containing 'Litres', and 'Current Odometer *' with a text box containing 'Start KM: 80'. Below these are two buttons: 'Odometer Image' (with a camera icon) and 'Fuel Invoice' (with a document icon). At the bottom of the form are two buttons: 'Cancel' and 'Add Fuel' (with a green checkmark). The background of the app shows a trip card with the same trip ID and a status of 'in_progress'. At the bottom of the screen, there's a numeric keypad with digits 1-9, 0, a decimal point, and a 'Done' button.

Step 15 Capture the Odometer and Invoice Photos

Tap Odometer Image to take a photo of your odometer. Then tap Fuel Invoice to take a photo of the fuel receipt. Both photos are required.

TIP You can also pick photos from your gallery if you have already taken them. Tap the thumbnail to confirm the photo is clear and readable.

Step 16 Save the Fuel Entry

Tap the green Add Fuel button. The fuel log is now attached to your trip, and the trip card will update to show “1 fuel log added”.

The screenshot shows the 'Field Attendance' app interface with a modal titled 'Add Fuel Entry'. The modal is for trip 'VT-C086 - Bajaj/Pulsar 150/TN01A0002 - GPS captured'. It contains input fields for '20' and '2', and a 'Current Odometer' field with '85'. Below these are two buttons: 'Odometer Image' (with a camera icon) and 'Fuel Invoice' (with a document icon). The 'Fuel Invoice' button has a 'No invoice' label below it. At the bottom of the modal are 'Cancel' and 'Add' (green) buttons. The background shows the 'Today' tab with 'Check In 11:15' and 'Check Out' buttons, and a 'Trip Totals' section with fields for Total KM (0), Duration (Hrs) (0), Total Fuel (L) (0), and Total Fuel Amt (0). A large red 'Check Out' button is at the bottom of the screen.

PART 4 Visiting a Customer (Secondary Trip)

When you leave the office (or your home) to visit a customer, record a Secondary Trip. This is done in two phases:

- **Phase 1 — Before you drive:** Set up the trip from your current location
- **Phase 2 — When you arrive at the customer:** Enter the customer visit details

IMPORTANT Two phases are important! The customer visit's GPS location is captured when you fill the visit form. If you fill it at the office, the location will be wrong. Always wait until you reach the customer to tap Enter Visits.

Step 17 Tap Setup Secondary Trip

On the Field Attendance screen, tap the blue Setup Secondary Trip (Home → Visit) button.

Step 18 Close Your Previous Trip

A “Close Previous Trip” popup will appear. Enter the End KM of your previous trip — this should be your current odometer reading. Tap Save & Exit. Your previous trip is now closed.

Step 19 Fill the Secondary Trip Details

The Vehicle Tracking form will open for your new trip. The Source will already be set to your previous destination (locked). Choose the customer location as your Destination.

New Vehicle Tracking 369ai.Biz

Source: Chinnakada, Kollam

Source Match: Not verified [Verify](#)

Destination:* Chandanathope

Estimated KM: 8.70 km **A**

Estimated Time: 0.16 hrs

☒ Odometer & Timing

Start KM : 85

Start Time : 26 May 2026 16:47:19

End KM : End KM
After Start Trip you can use this field.

End Time :
After Start Trip you can use this field.

Travelled KM :

Complete the form the same way as before — Start KM, Pre-Trip Checklist, Purpose of Visit. Tap Start Trip, then tap Save in the popup that follows.

Step 20 Drive to the Customer

A yellow Pending Trip Card will appear on the Field Attendance screen, with a green Enter Visits button on the right side. A yellow banner reminds you: “Once you reach the visit, enter the customer details.”

IMPORTANT Do not tap Enter Visits yet. Drive to the customer first. The button will be waiting for you when you arrive.

Step 21 Tap Enter Visits When You Arrive

When you reach the customer location, open the app and tap the green Enter Visits button on the pending trip card. The New Customer Visit form will open.

Step 22 Fill the Customer Visit Form

Fill in the visit details:

- **Customer** — pick from the customer list
- **Visited By** — defaults to your name
- **Date and Time** — defaults to now
- **Visit Purpose** — choose from the dropdown (Meeting, Delivery, Follow Up, etc.)
- **Visit Duration** — optional
- **Remarks** — describe what happened during the visit (minimum 25 characters)

Complete every required field: if something required is missing, a banner highlights it and the Save button stays disabled until it is filled (Remarks need at least 25 characters).

- **Photos** — optionally attach photos of the visit
- **Voice Note** — optionally record a quick voice note

The screenshot shows the 'New Customer Visit' form in the 369ai.Biz app. The form has a dark blue header with a back arrow, the title 'New Customer Visit', and the 369ai.Biz logo. Below the header, there are several input fields: 'Visited By' with a dropdown menu showing 'Administrator', 'Date and time' with a date and time picker showing '26-05-2026 16:47:47', 'Visit Purpose' with a dropdown menu showing 'Meeting', 'Visit Duration (mins)' with a dropdown menu showing 'Select duration', and 'Remarks' with a text area containing 'Meeting'. At the bottom of the form, there is a keyboard with a dark blue background and white text. The keyboard shows the letters 'q w e r t y u i o p' on the first row, 'a s d f g h j k l' on the second row, and 'z x c v b n m' on the third row. There are also icons for a backspace key, a spacebar, and a language selector set to 'English(India)'.

TIP Your GPS location is captured at this moment — the actual customer location. This is what makes Field Attendance accurate, so always fill this form AT the customer site.

Step 23 Save the Visit

Tap the Save button at the bottom of the form. The visit is now created and linked to your trip.

Back on the Field Attendance screen, the pending card will disappear. In its place, a Secondary Trip card will show both Trip Details (on the left) and Visit Details (on the right) side by side.

The screenshot shows the 'Field Attendance' screen of the 369ai.Biz app. At the top, there's a back arrow, the title 'Field Attendance', and the 369ai.Biz logo. Below the title bar, there are two status indicators: 'Open Source Trip' with a checkmark icon and '1 fuel log added' with a green checkmark icon. The main section is titled 'Secondary Trip'. It contains two side-by-side detail cards. The 'TRIP DETAILS' card lists: Source Trip (VT-0087), Source (Chinnakada, Kollam), Destination (Chandanathope), KM Travelled (0), Duration (Hrs) (00:00), GPS Lat (10.3546213), and GPS Lng (77.9726158). The 'VISIT DETAILS' card lists: Visit (CV/ 2026/00035), Customer (Sunil), Date / Time (2026-05-26 11:17), Location (10, Madurai Road, Naga...), Latitude (10.3546213), and Longitude (77.9726158). Below these cards are three buttons: 'Open Source Trip', 'View Visits', and 'Add Fuel'. Further down are two large buttons: a blue '+ Add Additional Trip' button and a green 'Primary Trip (Via Office or Direct)' button. At the bottom is a red 'Check Out' button with a right-pointing arrow icon.

TRIP DETAILS		VISIT DETAILS	
Source Trip	VT-0087 (Trip Starte...	Visit	CV/ 2026/00035
Source	Chinnakada, Kollam	Customer	Sunil
Destination	Chandanath ope	Date / Time	2026-05-26 11:17
KM Travelled	0	Location	10, Madurai Road, Naga...
Duration (Hrs)	00:00	Latitude	10.3546213
GPS Lat	10.3546213	Longitude	77.9726158
GPS Lng	77.9726158		

Trip Totals	
Total KM	5
Duration (Hrs)	0.02
Total Fuel (L)	2
Total Fuel Amt	20

Repeat Steps 17–23 for every customer you visit during the day.

PART 5 Going Back (Return Trip)

After your last customer visit, you have two ways to head back:

- **Via Office** — You return to the office first, then go home
- **Direct** — You go straight from the last customer to home

Step 24 Tap Primary Trip (Via Office or Direct)

On the Field Attendance screen, tap the green Primary Trip (Via Office or Direct) button.

Step 25 Choose Your Return Route

A popup will open with two options:

- **Via Office (Visit → Office)** — if you are stopping at the office first
- **Direct (Visit → Home)** — if you are going straight home. Tap the option you want.

Step 26 Close the Last Trip and Set Up the Return

Enter the End KM for your previous trip. Then complete the new Vehicle Tracking form — Source will be your last visit location, Destination will be your office (Via Office) or your home (Direct). Tap Start Trip, then Save.

A Return Home card will appear, showing the return leg details.

Check Out

Step 27 If You Stopped at the Office — Add Office to Home

If you chose Via Office, you still need to log the final leg from the office to home. Tap the orange Primary Trip (Office to Home) button.

Fill in the new Vehicle Tracking form — Source is the office, Destination is your home. Pick a Purpose of Visit from the dropdown.

The screenshot shows the 'Field Attendance' app interface. At the top, there's a header with a back arrow, 'Field Attendance', and the '369ai.Biz' logo. Below the header, there are two buttons: 'Open Source Trip' and 'View Visits'. The main content area is titled 'Return Home' and contains a 'Visit → Office' button. Below this, there's a 'TRIP DETAILS' section. A modal titled 'Primary Trip (Office to Home)' is open, showing a location picker, a 'Source Trip' field, and a 'Start KM' field with a placeholder 'Enter odometer reading'. At the bottom of the modal are 'Cancel' and 'Save' buttons. Below the modal, there's a 'Trip Totals' section with a table:

Trip Totals	
Total KM	Duration (Hrs)
15	0.05
Total Fuel (L)	Total Fuel Amt.
2	20

At the bottom of the screen is a large red button labeled 'Check Out'.

The screenshot shows the 'New Vehicle Tracking' app interface. At the top, there's a header with a back arrow, 'New Vehicle Tracking', and the '369ai.Biz' logo. Below the header, there are several input fields: 'Start Time' (26 May 2026 16:49:17), 'End KM' (End KM), 'End Time' (empty), 'Travelled KM' (0), and 'Duration (Hrs)' (empty). Below these fields is a section titled 'Trip Details' with a dropdown menu for 'Purpose of Visit' (Select purpose of visit), an 'Invoice Numbers' field with a QR code icon, and an 'Amount' field (0).

Complete the checklist, tap Start Trip, then Save. You will see “Office → Home leg added”.

PART 6 Ending Your Day (Check Out)

Step 28 Tap Check Out

When you are ready to end your day, tap the red Check Out button at the bottom of the Field Attendance screen.

Step 29 Close Your Last Open Trip

If your last trip is still open, an “End KM” dialog will appear. Enter the final odometer reading of your last trip and tap Save & Checkout.

Every customer visit you made today will be automatically marked as Done.

Step 30 Take Your Check Out Photo

The camera will open one last time. Position your face in the frame and wait for the countdown. The app will take your check-out photo and capture your final GPS location.

Step 31 Day Complete

The Field Attendance screen will refresh and show:

- A grey “checked out, read-only” banner
- **Trip Totals** — Total KM, Total Fuel, Total Fuel Amount

- All your trip and visit cards in read-only form
- A green “Field attendance complete” confirmation at the bottom

The screenshot displays the 'Field Attendance' app interface. At the top, there is a back arrow, the title 'Field Attendance', and the 369ai.Biz logo. The main content area is divided into three sections. The first section, titled 'TRIP DETAILS', shows information for 'Source Trip: VT-0088 (Trip Ended)', 'Source: Chandanathope', 'Destination: SITRA', 'KM Travelled: 5', 'Duration (Hrs): 00:01', 'GPS Lat: 10.3546213', and 'GPS Lng: 77.9726158'. Below this is a button labeled 'Open Source Trip'. The second section, titled 'Office → Home', also shows 'TRIP DETAILS' for 'Source Trip: VT-0089 (Trip Ended)', 'Source: SITRA', 'Destination: Dindigul East, Dindigul', 'KM Travelled: 5', 'Duration (Hrs): 00:01', 'GPS Lat: 10.3546213', and 'GPS Lng: 77.9726158', with an 'Open Source Trip' button. The third section, titled 'Trip Totals', displays a summary: 'Total KM: 20', 'Duration (Hrs): 0.060000000000000000 5', 'Total Fuel (L): 2', and 'Total Fuel Amt: 20'. At the bottom, a green banner with a checkmark icon and the text 'Field attendance complete' indicates the process is finished.

That's it — your day is sealed. Your manager and the HR system can now review everything you did, where, and when.

If a Trip Goes Over the Estimate

When you set up a trip, the app works out an estimated distance and travel time. If a trip ends up going well beyond that estimate, the app asks you to explain why before you can move on — so the extra kilometres or time are accounted for.

The Trip Needs a Reason popup appears automatically whenever a trip has gone over the estimate and still has no reason — for example:

- When you close a trip — right after you enter the End KM for a trip that went over the estimate.
- At check out — if any trip from the day is still over the estimate and has no reason yet.
- When you start your next trip — if you skipped the reason for an earlier over-trip, the popup returns the moment you try to set up a new Secondary or Additional trip.
- When you reopen the screen — if you closed the app before entering a reason, the popup comes back on its own the next time you open Field Attendance.

The popup shows the trip's Estimated, Actual, and Extra over figures for both distance (KM) and time, so you can see exactly how far past the estimate it went. Type a short reason (for example, "Customer asked me to visit an extra site" or "Heavy traffic detour") in the box and tap Submit Reason. A reason is required — the popup cannot be dismissed, and you cannot start a new trip or check out until it is filled in. If more than one trip went over, the app asks for each one in turn — once every trip has a reason, your close or check-out continues as normal.

Quick Reference — When to Use Which Button

Use this table as a fast lookup when you are out in the field.

Button	When to use it
Check In	At the start of your workday
Setup Primary Trip	When you drove from home to the office in the morning
Setup Secondary Trip	When you are heading out to visit a customer
Enter Visits	Only after you reach the customer — never at the office
Add Fuel	Any time you refuel during a trip
Primary Trip (Via Office or Direct)	When leaving your last customer of the day
Primary Trip (Office to Home)	After returning to the office, to log the office → home leg
Check Out	At the end of your workday

Things to Remember

- **Always** fill the customer visit form AT the customer location, not before.
- Take clear odometer and fuel invoice photos — blurry ones may be rejected.
- Close every open trip with an End KM before starting the next one.
- If the app is closed mid-flow, your pending trip will be saved. You can pick up where you left off.
- **Once you Check Out, the day is sealed.** You cannot edit your trips after that.
- If you lose internet during the day, the app stores your work and uploads it when you are back online.
- You can have only one attendance per day. If you already checked in via Office or Manual mode, Field check-in is blocked — and always check out in the same mode you checked in.
- **If a trip goes over its estimated KM or time, the app asks for a reason before you can finish — keep it short and specific.**
