FIELD ATTENDANCE

Employee Step-by-Step Guide

369ai.Biz Employee Attendance App

A simple guide to checking in, logging your trips and customer visits, recording fuel stops, and checking out for the day.

About Field Attendance

Field Attendance is the daily workflow for employees who work on the move — drivers, delivery staff, sales representatives, and field technicians. Instead of a single in-and-out punch from one office, the app lets you check in from anywhere, record every trip, log every customer visit at the actual visit location, add fuel stops, and check out at the end of the day.

The app also confirms it is really you and where you are: it takes your photo at check-in and check-out, captures your GPS location, and checks each trip against your saved source and destination. Everything is recorded in your office's timezone, so you and your manager always see the same times.

This guide walks you through everything you do during your workday, in the order you will do it.

Your Day at a Glance

- Open the app and verify your identity with your **PIN** or **fingerprint**
- **Check In** — capture a photo and your starting location
- Set up your **Primary Trip** (home to office)
- Add **Secondary Trips** for each customer visit, filled at the customer site
- Add **fuel stops** whenever you refuel
- Set up your **Return Trip** (visit to office, or visit to home)
- **Check Out** at the end of the day and see your trip totals

PART 1 Starting Your Day

Step 1 Open the App

On your phone, open the Employee Attendance app. You will see the **369ai.Biz** home screen with all the options. Scroll down to the **HR & Tracking** section and tap **User Attendance** to begin.

Step 2 Verify Your Identity

Confirm it is really you. Either tap **Scan Fingerprint** and use your enrolled finger, or type your 4-digit PIN under **Enter PIN** and tap **Verify PIN**. The **Device ID** shown at the bottom is your phone's registered ID — you don't need to do anything with it. The app then identifies you by your Badge ID.

Step 3 Go to the Field Attendance Screen

You will land on the **Field Attendance** screen. It shows today's date, the live time, and your name with a **FIELD** badge. The Check In and Check Out cards are empty until you act, and a **Check In** button sits at the bottom.

PART 2 Checking In

Step 4 Tap Check In

Tap the **Check In** button. A confirmation dialog asks “Are you sure you want to check in at 10:35 AM?” Tap **YES**.

Step 5 Take Your Check-In Photo

The app opens the camera. Position your face inside the dotted circle and wait for the countdown. The app automatically takes your photo and captures your current GPS location.

TIP *Your photo and location are your work-start anchor. Make sure your face is clearly visible and well lit before the countdown ends.*

Step 6 If You're Late, Give a Reason

If you checked in after your shift start time, a **You're Late** notice appears. It shows how late you are (for example, “2h 35m late for Session 1”), your expected start time, and any salary deduction that applies. Type a short reason in the box (for example, “Traffic”) and tap **Submit Reason**. A reason is required before the late check-in completes.

NOTE If you believe the deduction is unfair, you can raise a Late Waiver Request separately — your manager can then approve or reject it.

Step 7 You're Checked In

You are now checked in. The **Check In** time shows on the screen, and if you were late an amber banner shows the late time and deduction, with an **Update Reason** link. Below, the **Primary Trip** section appears with two blue buttons — **Setup Primary Trip (Home → Office)** and **Setup Secondary Trip (Home → Visit)** — and a red **Check Out** button waits at the bottom for the end of your day.

The screenshot displays the 'Field Attendance' app interface. At the top, there's a header with a back arrow, the title 'Field Attendance', and the logo '369ai.Biz'. Below the header, a user profile section shows a circular icon with the letter 'S', the text 'Good Afternoon Sri', and a 'FIELD' button. A navigation bar below this has 'Today' (selected) and 'History' tabs. The main content area features two large buttons: 'Check In 10:35' with a green arrow icon and 'Check Out' with a grey arrow icon. Below these are two yellow banners: the first says 'Late by 2:35 - Deduction 39.68' with a clock icon, and the second says 'How to fill your Field Attendance for today' with a calendar icon and a right arrow. The 'Primary Trip' section follows, showing a message 'No primary trip set up yet.' with a location pin icon. Below this are two blue buttons: '+ Setup Primary Trip (Home → Office)' and '+ Setup Secondary Trip (Home → Visit)'. Another yellow banner repeats the late notice: 'Late by 2:35 - Deduction 39.68', with 'Late reason Traffic' and an 'Update Reason' button. At the bottom is a large red button labeled 'Check Out' with a grey arrow icon.

PART 3 Your Primary Trip (Home → Office)

If you drove from home to your office before starting customer visits, log that journey as your Primary Trip. If you went directly from home to a customer site, you can skip this part and go straight to Part 5.

Step 8 Tap Setup Primary Trip

On the Field Attendance screen, tap the blue **Setup Primary Trip (Home → Office)** button. A small popup opens — tap **Create New Trip** to open the Vehicle Tracking form, where you record the details of your journey.

Step 9 Select Your Vehicle

In the **Vehicle Information** section, tap the **Vehicle** dropdown and choose the vehicle you are using today. Once you select a vehicle, the driver, plate number, and other details fill in automatically.

Step 10 Set Source and Destination

Your **Source** is filled in automatically from your phone's current GPS location. For the **Destination**, tap the field to open the map — search for the place or tap the map to drop a pin, then tap **Confirm Destination**. The app calculates the estimated kilometres and travel time automatically.

LOCATION CHECK Before the trip starts, the app uses GPS to confirm you are actually at the Source and Destination, within about 150 metres. If it shows you as too far, move closer and tap *Verify* again; if it still cannot confirm after one retry, you can continue anyway.

Step 11 Enter Start KM

Scroll to the **Odometer & Timing** section and enter your vehicle's current odometer reading in the **Start KM** field. Start KM must be greater than 0, and the trip will not start until the key fields — Vehicle, Source, Destination and Start KM — are filled; a banner shows anything still missing.

NOTE Each trip's Start and End times are recorded automatically when you start and close the trip — you do not type them — and every time is shown in your office's timezone. A trip you have not started stays as a draft you can re-open and finish later.

Step 12 Complete the Pre-Trip Checklist & Start the Trip

Scroll to the **Pre-Trip Checklist** and tap each item — Coolant Water, Oil Checking, Tyre Checking, Battery Checking, Fuel Checking, Daily Checks — to confirm your vehicle is ready. Add any notes under **Remarks**, optionally attach a trip photo, then tap **Start Trip**. You will see a “Trip started successfully!” message.

Step 13 Your Primary Trip Is Recorded

The app returns to the Field Attendance screen with your new trip shown as a card under **Primary Trip**, marked **in progress**. From the card you can **Open Source Trip**, **Add Fuel**, or move on to **Secondary Trip**. Your running **Trip Totals** appear lower down.

PART 4 Adding Fuel During a Trip

Any time you refuel during a trip, you can log it directly from the trip card. You can add fuel any number of times in a day.

Step 14 Tap Add Fuel and Fill the Form

On the Field Attendance screen, find the trip card for your current trip and tap the green **Add Fuel** chip. The **Add Fuel Entry** form slides up. Enter the **Fuel Amount** (how much you paid), the **Fuel Litres** (how many litres you fuelled), and your **Current Odometer** reading at the fuel stop.

The screenshot shows the 'Add Fuel Entry' form on the 369ai.Biz app. The form is overlaid on the 'Field Attendance' screen. It contains the following fields and buttons:

- Fuel Amount ***: Input field with the value 100.
- Fuel Litres ***: Input field with the value 1.
- Current Odometer ***: Input field with the value 1.
- Odometer Image**: Button with a camera icon.
- Fuel Invoice**: Button with a document icon.
- Cancel**: Button at the bottom left of the form.
- Add Fuel**: Green button at the bottom right of the form.

The background shows trip details:

- Duration (first): 00:00
- GPS Lat: 10.3515867
- GPS Long: 77.9755797
- Latitude: 10.3539457
- Longitude: 77.9729727

Step 15 Capture the Photos and Save

Tap **Odometer Image** to photograph your odometer, then tap **Fuel Invoice** to photograph the fuel receipt. Both photos are required. When the thumbnails appear, tap the green **Add Fuel** button — the fuel log is attached to your trip and the card updates to show “1 fuel log added”.

TIP You can also pick photos from your gallery if you have already taken them. Tap a thumbnail to confirm the photo is clear and readable before saving.

The screenshot shows the 'Add Fuel Entry' dialog box in the 369ai.Biz app. The dialog is titled 'Add Fuel Entry' and has a close button (X) in the top right corner. Below the title, it says 'For trip: VT-0151 · BYD/Maruti/TN · GPS captured'. There are two input fields: one for fuel quantity (100) and one for current odometer (600). Below these fields are two buttons: 'Odometer Image' and 'Fuel Invoice'. Each button has a corresponding photo thumbnail below it. At the bottom of the dialog are two buttons: 'Cancel' and 'Add Fuel'. The 'Add Fuel' button is green and has a checkmark icon. Below the dialog, a numeric keypad is visible, with buttons for digits 1-9, 0, a decimal point, and a 'Done' button.

PART 5 Visiting a Customer (Secondary Trip)

When you leave the office (or your home) to visit a customer, record a Secondary Trip. This is done in two phases: first you set up the trip from your current location before you drive, and then you enter the customer visit details once you arrive.

IMPORTANT *The customer visit's GPS location is captured when you fill the visit form. If you fill it at the office, the location will be wrong. Always wait until you reach the customer to tap Enter Visits.*

Step 16 Tap Setup Secondary Trip & Close Your Previous Trip

Tap the blue **Setup Secondary Trip (Home → Visit)** button. A **Close Previous Trip** popup appears — enter the **End KM** of your previous trip (your current odometer reading) and tap **Save & Exit**. The app verifies your location and closes the previous trip automatically.

Step 17 Fill the Secondary Trip Details

The Vehicle Tracking form opens for your new trip. The **Source** is already set to your previous destination. Choose the **customer location** as your Destination, then complete the form the same way as before — Start KM, Pre-Trip Checklist, and Purpose of Visit. Tap **Start Trip**, then **Save**.

Step 18 Drive to the Customer

A yellow **Pending Trip** card appears on the Field Attendance screen, with a green **Enter Visits** button on the right. A reminder banner reads: “Once you reach the visit, enter the customer details.”

IMPORTANT Do not tap Enter Visits yet. Drive to the customer first — the button will be waiting for you when you arrive.

The screenshot displays the 'Field Attendance' screen of the 369ai.Biz application. At the top, there's a navigation bar with a back arrow, the title 'Field Attendance', and the 369ai.Biz logo. Below the navigation bar, a yellow banner shows a clock icon and the text 'Late by 2:35 · Deduction 39.68'. Another yellow banner below it says 'How to fill your Field Attendance for today' with a right arrow. The main section is titled 'Primary Trip' and contains a card with trip details: 'Source Trip: VT-0150', 'From: 122A, Dindigul, Tamil Nadu', 'To: 9X2G+GGJ, Annamalaiyar School Road, Nagal Nagar, Tamil Nadu', and 'Status: ended'. Below this card is a blue button labeled 'Open Source Trip'. A yellow banner with an information icon and the text 'Once you reach the visit, enter the customer details.' is positioned above the 'TRIP DETAILS' section. The 'TRIP DETAILS' section lists: 'Ref: VT-0151', 'Source: 9X2G+GGJ, Annamalaiyar Schoo...', 'Destination: 36, Annamalaiyar School Road, Nagal ...', 'Vehicle: BYD/Marudi/TN', 'Driver: Juma', and 'Start KM: 596'. A green button labeled 'Enter Visits' with a location pin icon is to the right of the destination. Below this, a yellow banner reads 'Complete the visit for your pending trip before adding another.' The 'Trip Totals' section at the bottom shows 'Total KM: 11' and 'Total Fuel (L): 0'. A dark grey button labeled 'Trip started successfully!' is overlaid on the 'Total KM' field. The 'Total Fuel Amt' field also shows '0'.

Step 19 Tap Enter Visits and Choose the Customer

When you reach the customer location, open the app and tap the green **Enter Visits** button on the pending trip card. Pick the customer from the customer list — the app checks your proximity to the selected customer and records the latitude and longitude of where you are standing.

The screenshot shows the 'New Customer Visit' form in the 369ai.Biz app. The form is titled 'New Customer Visit' and has a back arrow on the left and the 369ai.Biz logo on the right. The form contains the following fields:

- Latitude:** A text input field containing '10.353946'.
- Longitude:** A text input field containing '77.972973'.
- Customer Name*:** A dropdown menu with 'Gulf Computer' selected.
- Visited By:** A dropdown menu with 'Administrator' selected.
- Date and time*:** A date and time picker showing '29 Jun 2026, 10:37:49'.
- Visit Purpose*:** A dropdown menu with 'Delivery' selected.
- Visit Duration (mins):** A dropdown menu with 'Select duration' selected.
- Remarks*:** A text area with the placeholder 'Enter Remarks'. A note at the bottom right of the text area says 'Min 25 characters required'.
- Photos:** A section with a 'Photos' title and two buttons: 'Camera' and 'Gallery'.

Step 20 Fill the Customer Visit Form

Complete the visit details: the **Customer**, **Visit Purpose** (Meeting, Delivery, Follow Up, and so on), an optional **Visit Duration**, and **Remarks** describing what happened (minimum 25 characters). You can also attach **Photos** and record a **Voice Note**. The **Visited By** and date-and-time fields default to you and now.

TIP Your GPS location is captured at this moment — the actual customer location. This is what makes Field Attendance accurate, so always fill this form AT the customer site.

The screenshot shows the 'New Customer Visit' form in the 369ai.Biz app. The form has a dark header with a back arrow, the title 'New Customer Visit', and the 369ai.Biz logo. Below the header, there are several input fields: 'Date and time*' with a calendar icon, 'Visit Purpose*' with a dropdown menu showing 'Delivery', 'Visit Duration (mins)' with a dropdown menu showing 'Select duration', and 'Remarks*' with a text area containing 'Delivery the product'. Below the text area, there is a note 'Min 25 characters required'. At the bottom, there is a 'Photos' section with 'Camera' and 'Gallery' options. A keyboard is visible at the bottom of the screen, showing the 'F' key highlighted.

Step 21 Save the Visit

Tap **Save** at the bottom of the form. You will see a “Customer visit created” confirmation. Back on the Field Attendance screen, the pending card is replaced by a **Secondary Trip** card showing **Trip Details** on the left and **Visit Details** on the right, side by side.

Repeat Steps 16–21 for every customer you visit during the day.

The screenshot displays the 'Field Attendance' interface on the 369ai.Biz app. At the top, there's a header with a back arrow, the title 'Field Attendance', and the logo. Below the header, a yellow banner indicates 'Late by 2:35 · Deduction 39.68'. Another yellow banner provides a link to 'How to fill your Field Attendance for today'. The main section is titled 'Primary Trip' and contains a card with trip details: Source Trip (VT-0150), From (122A, Dindigul, Tamil Nadu), To (9X2G+GGJ, Annamalaiyar School Road, Nagai Nagar, Tamil Nadu), and Status (ended). An 'Open Source Trip' button is present. Below this is a blue button labeled '+ Secondary Trip'. A 'Trip Totals' section shows metrics: Total KM (11), Duration (Hrs) (0.02), Total Fuel (L) (0), and Total Fuel Amt (0). Another yellow banner repeats the late notice. Below it, a 'Late reason' section shows 'Traffic' with an 'Update Reason' button. At the bottom, a red-bordered box displays a 'Success' message: 'Customer Visit created — CV/2026/00054'.

PART 6 Heading Back (Return Trip)

After your last customer visit, you have two ways to head back: Via Office, where you return to the office first and then go home, or Direct, where you go straight from the last customer to home.

Step 22 Choose Your Return Route

On the Field Attendance screen, tap the green **Primary Trip (Via Office or Direct)** button. In the popup, choose your **Return Route** — **Via Office (Visit → Office)** if you are stopping at the office first, or **Direct (Visit → Home)** if you are going straight home — then tap **Create New Trip**.

The screenshot displays the 'Field Attendance' screen with a 'Primary Trip (Via Office or Direct)' popup. The background shows trip details:

(Trip Ended)		2026/00054
Source	9X2G+GGJ, Annamalai...	Customer: Gulf Computer
Destination	36, Annama Iaiyar Scho...	Date / Time: 29 Jun 2026, 10:37
KM Travelled	4	Location: 122A, Dindigul, Ta...
Duration (Hrs)	00:02	Latitude: 10.3539457
GPS Lat	10.3518867	

The popup 'Primary Trip (Via Office or Direct)' contains the following elements:

- Trip picker**: Filtered, source = your previous destination.
- Return Route**:
 - ☒ Via Office (Visit → Office)
 - ☐ Direct (Visit → Home)
- Source Trip**:
 - Create New Trip**: Open Vehicle Tracking — source pre-filled to your last destination.
- Start KM**: Enter odometer reading.
- Buttons**: Cancel, Save.

Below the popup, the screen shows 'Late by 2:35 - Deduction 39.68', 'Late reason: Traffic', and an 'Update Reason' button. At the bottom is a large red 'Check Out' button.

Step 23 Set Up and Start the Return Trip

Enter the **End KM** for your previous trip, then complete the Vehicle Tracking form — Source is your last visit location, and Destination is your office (Via Office) or your home (Direct). Tap **Start Trip**, then **Save**. A **Return Home** card appears showing the return leg.

NOTE If you chose *Via Office*, log the final leg too: tap *Primary Trip (Office to Home)*, set Source to the office and Destination to your home, complete the checklist, then Start Trip and Save.

The screenshot shows the 'Field Attendance' app interface. At the top, there's a header with a back arrow, 'Field Attendance', and the '369ai.Biz' logo. Below the header, there are two boxes for GPS coordinates: 'GPS Lat: 10.3515867, GPS Lng: 77.9755797' and 'Latitude: 10.3539457, Longitude: 77.9729727'. There are two buttons: 'Open Source Trip' and 'View Visits'. A green notification says '1 fuel log added'.

The main section is titled 'Return Home' and contains a 'Visit → Home' button. Below this is a 'TRIP DETAILS' section with the following information:

- Source Trip: VT-0152 (Trip Started)
- Source: 36, Annamalaiyar School Road, Nagal Nagar, Tamil Nadu
- Destination: 41/1, Dindigul, Tamil Nadu
- KM Travelled: 0
- Duration (Hrs): 00:00
- GPS Lat: 10.3515867
- GPS Lng: 77.9755797

Below the trip details are two buttons: 'Open Source Trip' and 'Add Fuel'. A large blue button with a plus sign says '+ Add Additional Trip'.

The 'Trip Totals' section shows:

- Total KM: 15
- Duration (Hrs): 0.06
- Total Fuel: 1

A dark grey notification bubble says 'Trip started successfully!'. At the bottom, there's a section for 'Late by 2:35 · Deduction 39.68' and a 'Late reason' input field.

PART 7 Ending Your Day (Check Out)

Step 24 Tap Check Out

When you are ready to end your day, tap the red **Check Out** button at the bottom of the Field Attendance screen. The app warns that this will close your latest open trip and mark all draft visits as done. Confirm to continue.

Step 25 Close Your Last Open Trip

If your last trip is still open, an **End KM** dialog appears. Enter the final odometer reading of that trip and tap **Save & Checkout**. The app verifies your location, closes the trip, and automatically marks every customer visit you made today as **Done**.

End KM for VT-0152

Enter the trip's end odometer reading. We'll close the trip with this value and mark its visits done before checking you out.

End KM

6004 km

Start KM was 600. End KM must be higher.

Destination: 41/1, Dindigul, Tamil Nadu [Re-check](#)

7 8 9 .-

0 ,

Step 26 Take Your Check-Out Photo

The camera opens one last time. Position your face in the frame and wait for the countdown. The app takes your check-out photo and captures your final GPS location.

Step 27 Day Complete

The Field Attendance screen refreshes and shows a green **Field attendance complete** confirmation, your **Trip Totals** — Total KM, Total Fuel, and Total Fuel Amount — and all your trip and visit cards in read-only form.

DONE That's it — your day is sealed. Your manager and the HR system can now review everything you did, where, and when. You cannot edit your trips after checking out.

If a Trip Goes Over the Estimate

When you set up a trip, the app works out an estimated distance and travel time. If a trip ends up going well beyond that estimate, the app asks you to explain why before you can move on, so the extra kilometres or time are accounted for.

The **Trip Needs a Reason** popup appears automatically whenever a trip has gone over the estimate and still has no reason — when you close a trip, at check out, when you start your next trip, or when you reopen the screen after closing the app. It shows the trip's Estimated, Actual, and Extra-over figures for both distance and time. Type a short reason (for example, “Heavy traffic detour” or “Customer asked me to visit an extra site”) and tap **Submit Reason**.

HOW MUCH IS “OVER”? *A small allowance is built in — by default 5 km or 10 minutes. Within the allowance a trip reads “Within Estimate”; beyond it, it is marked “Over — Check” and a reason is required before you can save or finish. Your HR team can change this margin in the attendance configuration.*

Quick Reference — When to Use Which Button

Use this table as a fast lookup when you are out in the field.

Button	When to use it
Check In	At the start of your workday
Setup Primary Trip	When you drove from home to the office in the morning
Setup Secondary Trip	When you are heading out to visit a customer
Enter Visits	Only after you reach the customer — never at the office
Add Fuel	Any time you refuel during a trip
Primary Trip (Via Office or Direct)	When leaving your last customer of the day
Primary Trip (Office to Home)	After returning to the office, to log the office → home leg
Check Out	At the end of your workday

Understanding the “You're Late” Screen

The late notice can look alarming, so here is what each line means.

Term	What it means
Expected start	The official start time of your shift (for example, 08:00). You are “late” only if you check in after this, plus a short grace allowance.
Session 1	Your work session. Most staff have a single session; split-shift staff can have Session 1 and Session 2, each tracked separately.
Late #N this month	How many times you have been marked late this month. Your company allows a few “free” late times before deductions begin.
Salary deduction	The amount deducted for this late arrival, based on how late you are and your company's rules. Shows 0 while you are within the grace period.
Reason	A short explanation you type (for example, Traffic). It is stored with the record for your manager to see.

Being late and getting a deduction isn't always final — you can submit a [Late Waiver Request](#) asking your manager to waive it.

Location Verification

Field Attendance checks where you are, not just when:

- At check-in and on each trip, the app compares your GPS position with the saved location and shows the distance, for example “0m from the source.”
- If you are too far from the expected location, the action can be blocked — so you can't mark attendance from the wrong place.
- Keep your phone's Location/GPS turned on and the app's location permission allowed, or check-in and trip verification may fail.

Things to Remember

- **Always** fill the customer visit form AT the customer location, not before.
- Take clear odometer and fuel-invoice photos — blurry ones may be rejected.
- Close every open trip with an **End KM** before starting the next one.
- If the app is closed mid-flow, your pending trip is saved — you can pick up where you left off.
- You can have only **one attendance per day**. If you already checked in via Office or Manual mode, Field check-in is blocked — and always check out in the same mode you checked in.
- A short allowance (by default 5 km or 10 minutes) is built in before a trip counts as over the estimate, so minor differences are fine.
- If you lose internet during the day, the app stores your work and uploads it when you are back online.
- **Once you Check Out, the day is sealed** — you cannot edit your trips after that.

— *End of Guide* —
