HR SUITE FOR ODOO 19

ATTENDANCE LATE TRACKING

HR Step-by-Step Guide

Grace periods, deduction slabs, waivers, split shifts and half-day Fridays — a fair, configurable late policy.

A simple guide to setting up the late policy, reading late records, approving waivers and running the monthly summary.

PART 1 Finding Late Tracking

Step 1 Open the Late Tracking menu

Everything lives under Attendances → Late Tracking. From there you reach Late Records, Monthly Summary, Waiver Requests (or My Waiver Requests for staff), and a Configuration group with Office Hours & Working Days, Deduction Slabs and Public Holidays.

The Late Tracking menu — Late Records, Monthly Summary, Waiver Requests and the Configuration group.

PART 2 Configuring the Late Policy

Set the policy up once. The central screen is Office Hours & Working Days; two supporting screens define the slab amounts and the holiday calendar.

Step 2 Set Office Hours & Working Days

Open Configuration → Office Hours & Working Days. Each record defines the policy for a company, optionally narrowed to one Department, in a chosen Office Timezone.

Office Hours & Working Days — the policy record list, showing shift type, hours and deduction mode.

- **Scope** — Company, optional Department, Office Timezone (e.g. Asia/Muscat).
- **Late Settings** — Late Threshold (minutes) and Grace Late Times/Month.
- **Shift Type** — Single Shift (Session 1 only) or Split Shift (Session 1 + Session 2).
- **Office Hours** — the Start and End time for each session.
- **Working Days** — tick the days the company actually works.
- **Half-Day Friday** — enable it, set which Fridays (e.g. 2,4) and the shorter hours.

How it works: Single Shift: One work period per day. Late is checked on first check-in. Split Shift: Two work periods (e.g., 8AM-12PM + 2PM-6PM). Late is checked on first check-in of EACH session. Grace Times: Number of late times per month per session before deductions apply. With split shift, Session 1 and Session 2 each have their OWN grace count — e.g. Grace = 1 means the first Session 1 late and the first Session 2 late of the month are free; from the 2nd occurrence in EITHER session, deductions apply. Fixed Deduction: Uses the Deduction Slabs amounts. Hourly Deduction: Auto-calculates from employee wage. Formula: $\text{hourly_rate} = \text{wage} / \text{working_days_in_month} / \text{daily_hours}$. Working days are auto-computed from your working days config and public holidays. Each started hour of lateness = 1 hour deduction. E.g., wage 30000, 26 working days, 10 hrs → hourly rate = 115.38. Late 45min = 115.38 deducted. Late 65min = 230.77 deducted. No-wage fallback (Hourly mode): If an employee has no wage set, the hourly amount comes out 0, so the system falls back to the Deduction Slab amount. With no slab configured, such an employee's late deduction is simply 0 (no charge). Keep a basic slab as a safety net for unwaged employees.			

The full configuration form — scope, late settings, sessions, deduction mode, working days and half-day Fridays, with the Recompute Late Records button at the top.

TIP Use the Recompute Late Records button after changing the policy so existing records pick up the new office hours, grace and slabs.

Step 3 Choose a Deduction Mode

Two modes decide how much is deducted once an employee is past their grace quota. Pick the one that matches your payroll rules.

Deduction mode	How the amount is worked out
Fixed Amount (Slab-based)	The late minutes are matched to a row in the Deduction Slabs table and that fixed amount is charged.
Hourly Wage Calculation	An hourly rate (wage ÷ working days ÷ daily hours) is charged for each started hour late. Falls back to the slab if the employee has no wage.

Step 4 Set up Deduction Slabs

Open Configuration → Deduction Slabs. Each row is a minute range — Late From and Late To (set To = 0 for “and above”) — with a Deduction Amount. These are used directly in Fixed mode, and as a fallback in Hourly mode.

When are these slabs used?

- Office Hours config **Deduction Mode = Fixed Amount (Slab-based)** → these slab amounts are used for every late deduction.
- Deduction Mode = Hourly Wage** → these slabs are **NOT** used, except as a **fallback for employees with no wage** (whose hourly amount would otherwise be 0).

☐ Late Fro...	From (H:MM)	Late To (... To (H:MM)	Deduction Am...
☐	15 0:15	60 1:00	₹ 100.00
☐	60 1:00	0 Unlimited	₹ 50.00
☐	0 0:00	0 Unlimited	₹ 0.00

Deduction Slabs — each minute range and its fixed amount (To = 0 means “and above”).

Step 5 Maintain Public Holidays

Open Configuration → Public Holidays and add each holiday with a Name and Date. Holidays are removed from the working-days count, so no one is marked late on a day off.

NOTE The grace quota is counted per session, per month. With a split shift, the first late arrival in Session 1 and the first in Session 2 each use their own free allowance before any deduction applies.

PART 3 Working with Late Records

Step 6 Read a late record

Open Late Tracking → Late Records. Each check-in shows whether it Is Late, the Late Time (H:MM), the Session, whether it is a Half Day, the Late # in the month, the Deduction Amount and whether it was Waived. Use the Late Only, With Deduction, Missing Reason and group-by filters to focus. The Late Reason now appears as a column by default, so the explanation is visible without opening each record.

Employee	Check In (Office TZ)	Check Out (Office TZ)	Is L...	Late Time	Session	Half ...	Late Reason	Late #	Deduction A...	Waiv...	Daily Total Ho...	Worked Ho...	Worked Extra Ho...	Extra Hours
Administrator	19 Jun 2026, 02:32 PM	19 Jun 2026, 02:33 PM	☒	0:32	Session 2	☐		1	100.00	☐	00:01	00:00	00:00	00:00
Juma	25 May 2026, 05:11 ...	25 May 2026, 05:30 ...	☒	3:11	Session 2	☐	Late	1	207.79	☐	00:19	00:19	00:00	00:00
Administrator	20 May 2026, 03:03 ...	20 May 2026, 05:40 ...	☒	1:03	Session 2	☐	c	1	50.00	☐	02:37	02:37	00:00	00:00

Late Records with the Late Only filter — late time, session, late #, deduction and waiver status per check-in.

Step 7 Enter a late reason

On a late attendance, click Enter Late Reason in the Late Tracking section and type the explanation, or type straight into the Late Reason field. The button is hidden once a reason is filled or the record is waived. Before you save, the pop-up previews the late time, the session, the expected start, the Late # in the month and the Deduction amount, so you can see exactly what will be deducted. Once a reason is saved the button changes to Update Reason (click it to edit the wording), and the button is also hidden after check-out.

PART 4 The Late Waiver Workflow

A waiver lets a manager cancel a late deduction when the lateness was justified. It moves through a simple, audited set of states.

Step 8 Submit a waiver (employee)

On a late record, raise a waiver request, fill the Reason for Waiver and click Submit for Approval. The request moves from Draft to Pending Approval.

Waiver Requests — a request awaiting manager approval (Pending Approval).

State	Meaning	Who acts / button
Draft	Being prepared.	Employee — Submit for Approval
Pending Approval	Waiting on a manager.	Manager — Approve Waiver / Reject
Approved	Deduction waived (set to zero).	—
Rejected	Declined, with a reason.	Employee — Reset to Draft

PART 5 The Monthly Late Summary Report

Step 10 Generate the summary

Open Late Tracking → Monthly Summary. Choose the Month and Year, optionally a Department or specific Employees, then click Generate Summary.

Step 11 Read the summary

The report lists one row per employee with Total Late Days, Total Late Time (H:MM) and Total Deductions. Only late arrivals beyond the grace quota are counted — free late times are not in the totals — so the figures match what payroll should deduct.

IMPORTANT The summary always counts only the late occurrences after the monthly grace quota, and never counts waived records, so it never over-deducts.

Quick Reference — Menus & Buttons

Where	What it does
Office Hours & Working Days	Define office hours, grace, shift type, working days and half-day Fridays.
Deduction Slabs	Set the fixed amounts charged for each late-minute range.
Public Holidays	Keep the holiday calendar so days off never count as late.
Late Records	Review every check-in, the late time and the deduction.
Enter Late Reason	Record why an employee was late.
Waiver Requests	Submit, approve or reject a waiver of a late deduction.
Monthly Summary	Generate the per-employee late totals for payroll.
Recompute Late Records	Reapply the policy after a configuration change.

Things to Remember

- Set Office Hours, grace and deduction mode before anything else — everything builds on them.
- Grace is per session, per month; deductions start only after it is used up.
- Keep Public Holidays current so no one is flagged late on a day off.
- Recompute Late Records after any policy change.
- Approved waivers zero the deduction; the monthly summary never counts waived or in-grace records.
- A late check-in cannot be saved in the backend without a Late Reason — enter it through the Enter Late Reason pop-up first (waived records are exempt).

— End of Guide —
