HR SUITE FOR ODOO 19

HR FIELD ATTENDANCE

HR Step-by-Step Guide

Attendance built from vehicle trips and customer visits — with GPS, fuel and trip totals.

A simple guide to running a day in the field: check in, log your trips and visits, and check out.

Module Version 19.0.1.15.4 · Odoo 19 · Human Resources

About This Module

HR Field Attendance is for people who work on the road rather than at a fixed desk — drivers, sales and service staff who move between the office and customer sites. Instead of a single check-in, a whole day's journey is captured on one attendance record: the trips taken, the customers visited, the distance and fuel used, and the GPS location for each leg.

This guide walks through a field day in the order you live it: check in, set up your first trip, add more trips and visits as the day goes on, head back home, and check out. Everything is driven by clearly labelled buttons on the attendance form, so you never have to guess the next step.

What the Module Gives You at a Glance

- **A Field source flag** — field attendance is marked separately from manual office attendance.
- **One primary trip plus unlimited additional trips** — a full day of stops on a single record.
- **Customer visits** — each visit is linked to the trip it happened on.
- **GPS capture** — latitude and longitude from the trip or the first visit.
- **Trip Totals** — total distance, duration, fuel litres and fuel amount across every trip.
- **Guided buttons & pop-ups** — set up the primary trip, add trips, and close the previous trip automatically.

Who this is for: Field Employees who record their day, and HR Officers / Managers who review field attendance, GPS, visited stops and the trip totals afterwards.

PART 1 Finding Your Field Attendance

Field attendance lives in two convenient places, so you can reach it from the desktop or the standalone app icon.

Step 1 Open the Field Attendance list

From the main menu open Attendances → Field Attendance. You land on My Field Attendance, which shows only your own records. There is also a Field Attendance app icon in the app launcher (the nine-dot grid) that opens the same screen.

The screenshot shows the HR Field Attendance interface. At the top, there's a navigation bar with various menu items: Attendances, Overview, Management, Kiosk Mode, Reporting, Late Tracking, Field Attendance, Leave Requests, Employee Report, User Guide, and Configuration. Below this, there's a sub-menu for 'Attendances' with a 'New' button and a search bar. The main content area displays a table with two rows of data for May 2026 and June 2026. The table has columns for Employee, Check In (O...), Check Out (...), Is Late, Late Time, Session, Halt Day, Late Reason, Late #, Deduction A..., Waived, Daily Total ..., Worked Ho..., Worked Ext..., and Extra Hours.

Employee	Check In (O...	Check Out (...)	Is Late	Late Time	Session	Halt Day	Late Reason	Late #	Deduction A...	Waived	Daily Total ...	Worked Ho...	Worked Ext...	Extra Hours
▶ May 2026 (2)								1	257.79			02:56	00:00	00:00
▶ June 2026 (2)								1	139.68			00:01	00:00	00:00

The Field Attendance menu — My Field Attendance and All Field Records.

- **My Field Attendance** — every employee sees their own field days here.

- **All Field Records** — HR Officers and Managers see everyone's field attendance.

The Field Attendance list view.

TIP The list shows the date, employee, check-in and check-out (in office time), the source trip, the visited stops, the location and the trip totals — a quick way to scan a day before opening it. Use the Late Only, With Deduction and Waived filters to narrow it down.

PART 2 The Field Attendance Form

Opening a field attendance record shows the standard check-in / check-out header plus a Field Attendance area built from three parts.

The screenshot shows the 'Field Attendance' form in the 369ai.Biz system. At the top, a navigation bar includes links for Attendances, Overview, Management, Kiosk Mode, Reporting, Late Tracking, Field Attendance, Leave Requests, Employee Report, User Guide, and Configuration. Below this, a 'New' button is next to 'Field Attendance From 05:03 PM'. A prominent orange banner at the top provides a 7-step guide for using the system, covering scenarios like being late, going home to office, customer visits, and checking out. Below the banner, the form displays employee details for 'Sri', including 'Check In' time (Jun 19, 6:33 PM) and 'Check Out' status (Currently Working). It also shows 'Worked Time' and 'Extra Hours' as 00:00. The 'CHECK IN' section indicates the mode is 'Manual'. The 'LATE TRACKING' section contains a table with fields for Session, Check In (Office Time), Expected Start Time, Is Late (checked), Late (Minutes), Late Time, Half Day, Late Reason, Traffic, Late # in Month, Deduction Amount, Waiver Approved, and Daily Total Hours. At the bottom, the 'FIELD ATTENDANCE' section features two buttons: '+ Setup Primary Trip (Home to Office)' and '+ Setup Secondary Trip (Home to Visit)'.

Guidance Banner:

1. Were you late today? If yes, scroll down to **Late Tracking** and click **Enter Late Reason**. Type why and save. If you were on time, skip this.
2. Going from Home to Office? Click **Setup Primary Trip (Home to Office)** and fill in the trip you used. You stay in office mode after this — no return needed.
3. Going from Home directly to a customer visit? Click **Setup Secondary Trip (Home to Visit)** and fill in the trip and the customer you visited.
4. Made more visits after the first one? Click **Add Additional Trip** each time. The system will ask you to close your previous trip first — just type the **End KM** and save. Then pick the next trip and visit.
5. Time to head back from your last visit? Click **Primary Trip (Via Office or Direct)**:
 - **Via Office** — you go to office first, then home. After saving the Visit → Office leg, click **Primary Trip (Office to Home)** to log the second half.
 - **Direct** — you go straight from the visit to home. One save and you're done with the return.
6. Need to do another visit before going home? After any return leg, click **Add Additional Trip** at the bottom to start a new visit. The Via Office / Direct choice comes back when you're ready to return again. This loops as many times as needed.
7. Done for the day? Click **Check Out Now** at the top. Your last open trip closes automatically, every visit is marked as Done, and the whole page locks — buttons go away and nothing on it can be edited anymore.

Employee Information:

FIELD ATTENDANCE

+ Setup Primary Trip (Home to Office) + Setup Secondary Trip (Home to Visit)

The field attendance form — guidance banner, Late Tracking and the trip buttons.

Step 2 Read the Primary Trip Card

The primary trip card is the main trip of the day — usually Home → Office. It shows the Source Trip, the Source and Destination Location, KM Travelled and Duration, the GPS Latitude and Longitude, and a Location name. From the card you can Edit Primary Trip, Open Source Trip, View Visits or Add Fuel.

Step 3 Read the Additional Trips & Return Home sections

Each extra trip appears as a card with two columns: Trip Details (source, destination, KM, duration, GPS) on the left and Visit Details (the customer, date, location and GPS of the visit) on the right. When you start heading back, the return legs are grouped under a Return Home section and labelled Visit → Office, Office → Home or Visit → Home (Direct).

SECONDARY TRIP

TRIP DETAILS	VISIT DETAILS
Source Trip: VT-0098 (Trip Started)	Visit: CV/2026/00037
Source Location: Chandanathope	Customer: Gulf Computer
Destination Location: Madurai road	Date / Time: Jun 19, 6:38 PM
KM Travelled: 0	Visit Location:
Duration (Hrs): 00:00	Visit Latitude: 0.00000000
GPS Latitude: 8.9292400	Visit Longitude: 0.00000000
GPS Longitude: 76.6409300	

TRIP TOTALS

Total KM Travelled	60	Total Fuel (Litres)	1.00
Total Duration	00:02	Total Fuel Amount	100.00

An additional trip card — Trip Details on the left, Visit Details on the right.

RETURN HOME

RETURN TRIP — VISIT → HOME (DIRECT)	Duration (Hrs):
Source Trip: VT-0101 (Trip Started)	00:00
Source Location: Madurai road	GPS Latitude: 10.3543000
Destination Location: Chinnakada, Kollam	GPS Longitude: 77.9706000
KM Travelled: 0	

TRIP TOTALS

Total KM Travelled	100	Total Fuel (Litres)	1.00
Total Duration	00:04	Total Fuel Amount	100.00

The Return Home section — a Visit → Home (Direct) leg.

Step 4 Read the Trip Totals

The Trip Totals group adds everything up for the day: Total KM Travelled, Total Duration, Total Fuel (Litres) and Total Fuel Amount. These are calculated automatically from all the trips on the record. Every time on the record — each trip's Start Time and End Time, and each visit's Date / Time — is now shown in the company's Office Timezone. Start Time and End Time are read-only: they are captured automatically when you start and close a trip, so you no longer type them in.

PART 3 A Day in the Field

This is the heart of the module — the buttons you press, in order, across a working day.

Step 5 Check in

Start your day with a check-in (from the app or the form). The attendance is marked as a Field source and the workflow guidance banner appears to point you to the next action.

Step 6 Enter a late reason (only if you were late)

If you arrived late, scroll to the Late Tracking section and click Enter Late Reason, then type why. If you were on time, skip this step.

The Enter Late Reason pop-up.

Step 7 Set up your primary trip

Click Setup Primary Trip (Home to Office). Pick the trip from the Pick a Trip list, enter the Start KM, optionally name the Location, and click Save. The trip starts automatically and the primary card fills in. If you are going straight from home to a customer instead, click Setup Secondary Trip (Home to Visit) and choose the trip and the visit.

Closing the previous trip with the End KM entered.

The screenshot shows the HR Field Attendance interface. The top navigation bar includes: Attendances, Overview, Management, Kiosk Mode, Reporting, Late Tracking, Field Attendance, Leave Requests, Employee Report, User Guide, and Configuration. The main header displays 'New Field Attendance From 05:03 PM' with a gear icon. A 'Check Out Now' button is visible. The left sidebar shows 'Is Late' (checked), 'Late (Minutes)' (183), 'Late Time' (3:03), and 'Half Day' (unchecked). The 'FIELD ATTENDANCE' section shows 'Source Trip' (VT-0096 (Trip S...)), 'Source Location' (Chinnakada, Ko...), 'Destination Location' (Chandanathope), and 'KM Travelled' (0). Below this are 'Edit Primary Trip' and 'Open Source Trip' buttons. The 'TRIP TOTALS' section shows 'Total KM Travelled' (0), 'Total Duration' (00:00), 'Total Fuel (Litres)' (1.00), and 'Total Fuel Amount' (100.00). The 'Add Additional Trip' modal is open, displaying the following information: Source Trip: VT-0098 (Draft), Source Location: Chandanathope, Destination Location: Madurai road, Start KM: 160, GPS Latitude: 8.9292400, GPS Longitude: 76.6409300. The modal includes an 'Open Source Trip' button, a 'Visit' dropdown menu, and 'Save' and 'Discard' buttons.

Add Additional Trip — choose the trip and the visit.

The screenshot shows the HR Field Attendance interface with the 'Add Additional Trip' modal open. The modal displays the same trip information as the previous screenshot. The 'Visit' dropdown menu is now set to 'New', and the 'Visit Customer' is set to 'Gulf Computer'. The 'Visit Date / Time' is set to 'Jun 19, 6:38 PM'. The 'Visit Latitude' and 'Visit Longitude' are both set to '0.00000000'. The modal includes an 'Open Source Visit' button and 'Save' and 'Discard' buttons.

Add Additional Trip with its customer visit attached.

Creating a customer visit from the field-attendance flow.

NOTE Adding a new trip always closes the previous one first, so your distance and fuel figures stay accurate. Ended trips are locked and hidden from the trip picker.

Step 9 Head back home

When you are ready to return, click Primary Trip (Via Office or Direct) and choose a route: Via Office (Visit → Office, then Office → Home) or Direct (Visit → Home). For the Via Office route, after the first leg saves, the Primary Trip (Office to Home) button appears for the second leg.

Primary Trip (Via Office or Direct) — choose the return route.

Step 10 More visits before home (optional)

Need one more visit after starting back? Click Add Additional Trip again — the Return Home section steps aside and a fresh outbound trip begins. Repeat the cycle as many times as the day needs.

Step 11 Check out

At the end of the day click Check Out Now at the top. If a trip is still open you are asked for the End KM first (Save & Exit). On check-out the last trip is closed, every visit is marked Done, and the whole record locks read-only.

New Field Attendance / From 05:03 PM
0007 (05:03 PM-05:10 PM) ⚙

How to fill your Field Attendance for today
Just follow these steps in order:

1. **Were you late today?** If yes, scroll down to **Late Tracking** and click **Enter Late Reason**. Type why and save. If you were on time, skip this.
2. **Going from Home to Office?** Click **Setup Primary Trip (Home to Office)** and fill in the trip you used. You stay in office mode after this — no return needed.
3. **Going from Home directly to a customer visit?** Click **Setup Secondary Trip (Home to Visit)** and fill in the trip and the customer you visited.
4. **Made more visits after the first one?** Click **Add Additional Trip** each time. The system will ask you to close your previous trip first — just type the **End KM** and save. Then pick the next trip and visit.
5. **Time to head back from your last visit?** Click **Primary Trip (Via Office or Direct)**:
 - **Via Office** — you go to office first, then home. After saving the Visit — Office leg, click **Primary Trip (Office to Home)** to log the second half.
 - **Direct** — you go straight from the visit to home. One save and you're done with the return.
6. **Need to do another visit before going home?** After any return leg, click **Add Additional Trip** at the bottom to start a new visit. The Via Office / Direct choice comes back when you're ready to return again. This loops as many times as needed.
7. **Done for the day?** Click **Check Out Now** at the top. Your last open trip closes automatically, every visit is marked as Done, and the whole page locks — buttons go away and nothing on it can be edited anymore.

FIELD ATTENDANCE

This attendance has been checked out and is now read-only. You can view your trips and visits below but no further edits are allowed.

Source Trip	V1-0026 (Trip Ended)	GPS Latitude	8.28963801
Source Location	Chinnakada, Kollam	GPS Longitude	76.5900050
Destination Location	Chandanathope	Location	Chinnakada, Kollam
KM Travelled	120	Duration (1hr)	00:05

[Open Source Trip](#)
1 fuel log added

After check-out the record is locked read-only.

IMPORTANT Once an attendance is checked out it becomes read-only and the action buttons disappear. Double-check your trips and End KM before you check out.

PART 4 Reviewing Field Attendance

Step 12 Review field attendance

Managers open All Field Records to review any employee's day. Group by Employee, Department, Trip, Date or Month, and filter by My Records, Late Only, With Deduction or Waived. Open any record to inspect the trips, visits, GPS and trip totals.

Quick Reference — Buttons

Button	When to use it
Setup Primary Trip (Home to Office)	Start the day's main trip from home to the office.
Setup Secondary Trip (Home to Visit)	Go straight from home to a customer visit.
Add Additional Trip	Record the next stop; closes the open trip first.
Primary Trip (Via Office or Direct)	Begin the journey home — via office or direct.
Primary Trip (Office to Home)	Second leg of the via-office return.
Open Source Trip / View Visits	Open the full trip record or the linked visits.
Add Fuel	Log fuel against the current trip.
Check Out Now	End the day; closes the last trip and locks the record.

Things to Remember

- Check in first — the form guides you to each next button.
- Always enter the End KM when closing a trip so distance and fuel stay correct.
- Use Via Office or Direct to match how you actually travel home.
- Trip Totals add up KM, duration and fuel automatically across every trip.
- Checking out marks all visits Done and locks the record — review before you check out.
- All trip and visit times are shown in the Office Timezone; a trip's Start and End times are captured automatically when you start and close it.

— End of Guide —
